Program Overview

ZERODIUM is the world's leading exploit acquisition platform for premium zero-days and advanced cybersecurity capabilities. **We pay BIG bounties to security researchers** to acquire their original and previously unreported zero-day research. While the majority of existing bug bounty programs accept almost any kind of vulnerabilities and PoCs but pay very low rewards, **at ZERODIUM we focus on high-risk vulnerabilities with fully functional exploits** and we pay the highest rewards (**up to \$2,500,000 per submission**).
