Apple Privacy

Privacy is a fundamental human right. At Apple, it's also one of our core values. Your devices are important to so many parts of your life. What you share from those experiences, and who you share it with, should be up to you. We design Apple products to protect your privacy and give you control over your information. It's not always easy. But that's the kind of innovation we believe in.

Your data. Your choice.

App Tracking Transparency lets you control which apps are allowed to track your activity across other companies' apps and websites.
